EXPERIENCE

Attendify (Attendance System)

Fullstack Developer, Sep 2025 - Dec 2025

- Developed a secure frontend using Dynamic QR codes, Geo-location, and Face Verification to eliminate attendance fraud.
- Designed a responsive instructor dashboard for real-time tracking and automated reporting.

CADT Compass

Full-Stack Developer, Sep 2025 - Dec 2025

- Engineered an end-to-end campus navigation app using React.js and deployed via Vercel.
- Integrated mapping logic to provide seamless, real-time directions across the CADT campus.

Baristar (AI Translation)

Full-Stack Developer, June 2025 - Sep 2025

- Developed an AI-driven platform for real-time Sign Language and Speech translation for coffee shop environments.
- Handled the full-stack architecture to ensure low-latency communication between baristas and customers.

UBRU GPA Scraper

Full-Stack Developer, Jan 2025 - Feb 2025

- Built a web scraper and analysis tool to extract academic data from the UBRU registration system.
- Implemented advanced filtering, progress tracking, and secure data export (CSV/PDF) features.
